

# Easy Tap™ Paste

## Tapping Paste

- Easy Tap™ Paste is a best action cutting and tapping paste used for tapping, drilling and threading in various applications.
- It's a petroleum base product and a little pinch of Easy Tap™ Paste can give you great results in these applications.
- It sublimates, hence heat removal is faster and better and it has got good cooling and lubricating properties due to which it increases tap life and gives your job a superfine finish. It is a unique product which can be used on all metals including aluminium, titanium, brass, copper, etc.
- It is required less as it does not get wasted by rolling down your tap. It can be used for both, open and close tapping.
- It has VPG features for maximum Vapour Phase Protection.
- It is operator friendly as it is non-toxic, non-flammable and non-explosive. However, its vapours should not be inhaled.
- Easy Tap™ Paste is packed in 250 Gms, 1000 Gms and Jars as per the requirement of the user.
